

A Day in the Desert

The desert is gray and green
Its animals are clever and keen
For they need to know a lot
To live in a place that's very hot
Desert creatures enjoy the shade
And come out when the sun begins to fade

In a place kept from the sea
Water is important for everybody
The desert is so pretty
Let's not cover it with the city
So if you want to see the desert thrive
You have to help keep it alive.
